

## Jasminum fluminense

Family Oleaceae

KSW Muasmini

Self seeded

Sun / partially shaded. Trailing / climbing shrub with sweetly scented flowers. Black fruit.

Flowers attract birds & birds eat seed.

Easily self seeds and therefore can be invasive and will damage young trees, however Jasmin provides an attractive hedge that can be pruned.

Larvae host plant to moths - *Daphnis nerii*

*Daphnis nerii* -Oleander Hawk Moth
